EXPERIENCE & RESEARCH

Master's Thesis Researcher, *Purdue Network Research Lab*

Aug 2025 – Present

- Developed a customized TextArena framework with agentic AI using constrained decoding and distributed training.
- Compared prompt optimization (GEPA) and reinforcement learning methods and proposed NPO, a simple prompt-optimization method competitive with GEPA and GRPO.

AI Intern, *OSW, Chengdu*

May 2025 – Jul 2025

- Built a PDF analysis agent by LoRA-fine-tuning Qwen3-32B, integrated it into a multimodal platform, and deployed the service using Docker and server-side APIs.

SELECTED TECHNICAL PROJECTS

- Computer Network Systems:** Implemented software-defined networking (SDN), TCP congestion control, and adaptive bitrate (ABR) algorithms in Python.
- Compiler Engineering:** Built an ANTLR-based compiler translating C# programs to assembly.
- Reinforcement Learning:** Implemented PPO from scratch for Cart-Pole Swing-Up using parallel environments and custom actor-critic networks.
- Senior Design — IoT Parking System:** Led a four-person team developing an ESP32/Raspberry Pi parking system with ultrasonic sensing and a custom PCB.
